

Smithfield Foods Meat Rail Beam Replacement

Reinforced

We are proud of our large number of clients with whom we have completed multiple projects – Smithfield Foods is a prime example. This time we were called in to replace existing steel meat rail beams. Our scope of work included removing existing rail hangers and rails, and disposing of the existing steel beams in the processing areas. We then installed new galvanized steel beams and new meat rail hangers. Ayars & Ayars, Inc. went in on Thursday night at midnight and worked around the clock until Sunday afternoon to complete this phase so we wouldn't interfere with Smithfield Foods regular schedule.

Project Details

Location:
Lincoln, Nebraska

Size:
735 sq. ft.

Type of Construction:
Special Projects Group

Project Completion:
2016

We've worked with local farm families for over 50 years to secure the best quality pork.
