

Religious

First Lutheran Church

Expanding to Meet the Need

Highlighting the abilities of our carpenters, masons, and concrete crew, this design/build renovation added functionality and enhanced the worship experience for members of First Lutheran Church. The South addition created space for a new chancel, apse and sacristy. A second addition on the north end of the existing facility provides a new entrance, an expanded narthex, enhanced accessibility throughout the facility and work/office space. Expanding the church's footprint allowed for a bigger nave, increased seating capacity and technological enhancements that the modern worship experience demands.
