Greenleaf Properties Reroof Superior Street

Green Thumb

Ayars & Ayars, Inc. has collaborated on several projects with Greenleaf Properties throughout Lincoln, NE. We constructed this original facility and were excited to be selected for the reroof project. The new Butlerib-II Roof System, which includes a moisture protection barrier, is installed on top of the existing roof. By placing the new roof system directly on top of the existing roof, it allows the building to remain operational while also speeding up the entire construction process. Our scope of work included site work and metals.
