

Industrial

Manildra Energy - Project Reno

Earth Friendly Facility

One of the by-products of ethanol production is the food additive; gluten. Ayars & Ayars, Inc. was proud to be design-builder of Manildra Energy's gluten production project. In addition to the gluten plant, we were also responsible for erecting storage silos and a load out facility; facilitating the transfer of the finished product for shipment via railcar.

Project Details

Location:
Hamburg, Iowa

Size:
21,658 sq. ft.

Type of Construction:
Pre-Cast Concrete
