Nature's Variety

Doggone Good Treats

Historians of Ayars & Ayars, Inc. will immediately recognize a portion of this building as a project we completed in 1995. The new owner re-purposed this facility as a warehouse for their line of pet products but found that the original structure needed to be enlarged to meet their needs. Ayars & Ayars, Inc. is pleased to have been selected to erect this pre-engineered building addition for Nature's Variety. Our scopes of work on this project included: foundations, metal building erection, concrete flat work, paving and interior finishes.
