## Saint Mark's on the Campus

### The Beauty of Nature

The goals of this design-build project were to enhance the appearance and correct the site elevations of Saint Mark's courtyard. By redefining the square's contours, Ayars & Ayars, Inc. was able to establish proper drainage and provide this beautiful entrance to the chapel. The abilities of our masons are highlighted by the brick walls that border the landscaping and provide a shady spot for visitors to rest. Saint Mark's on the Campus endeavours to serve the spiritual needs of university students.

### Project Details

➤ Location:  
Lincoln, Nebraska

➤ Size:
