

University of Nebraska Concrete Projects

On Solid Ground

Our Special Projects Group (SPG) has achieved “preferred concrete contractor” status with the University of Nebraska - Lincoln Campus. In this role, SPG is the University’s first choice for new and replacement concrete projects not directly associated with buildings currently under construction. Experience gained through SPG’s large project portfolio has enabled them to develop expertise that translates into high quality workmanship and faster project completion. Ayars & Ayars, Inc. created SPG to bring the same level of construction excellence our clients have come to expect to projects of smaller scope.

Project Details

- Location:
Lincoln, Nebraska
- Between January 1, 2011 and March 5, 2017 250+ concrete projects were completed. More are anticipated.
- Typical project scopes include: concrete flatwork, sidewalks, paving and cast-in-place concrete walls.
- The 54 projects represent 4,107 cubic yards of concrete placed.
- The University of Nebraska Lincoln Campus was chartered in 1869.
