WSM Warehouse Addition and Remodel

Adding On!

Ayars & Ayars, Inc. partnered with WSM to provide design/build services for an addition and remodel to their facility in Omaha, NE. The addition includes 10" thick concrete floors reinforced with rebar to ensure strength to withstand the high volume forklift traffic. It is constructed using pre-engineered steel. We installed new lighting in the existing storefront and painted interior and exterior walls. Our talented design team was able to establish one aesthetically pleasing concept to tie the existing facility and the addition together seamlessly.
