## Center For People In Need

### Self Sufficient

Repurposing a former "big box" retail outlet into a hub for serving the area's less fortunate was the goal of this design-build project. Amenities include: professional offices, training rooms, public meeting area, "Gifts in Kind" redistribution center, commercial kitchen and warehouse space. Keeping a "big picture focus" throughout this multi-phased project enabled Ayars & Ayars, Inc. to construct a cohesive facility to meet the multiple demands placed on it by the Center's ever changing clientele.

### Project Details

➤ Location:  
Lincoln, Nebraska
