

Central Lumber Sales - Addition

No Challenge Too Small

Ayars & Ayars, Inc. was called upon when Central Lumber Sales was in need of more warehouse and manufacturing space. We constructed a Butler® Pre-Engineered Metal Building addition that not only added extra space but also overcame a big challenge by re-configuring one area of the existing roof to create an overall gabled roof over the entire building. Installation of new tile floors and a fresh coat of paint in the existing bathrooms were the finishing touches to this project.

Project Details

➤ Location:
Lincoln, Nebraska

➤ Size:
5,994 sq. ft.

➤ Type of Construction:
Pre-Engineered Metal Building

➤ Project Completion:
2011
