## Gretna Fire Station

### Outstanding Protection

A masonry facade, canopies, and an aluminum store front entryway begins to re-define the limits of what a pre-engineered metal building can become. A mezzanine over the office area services the eight bays housing fire trucks and emergency vehicles. Other amenities include radiant heating and interior trench drains that facilitate easy cleanup of vehicles and garage space.

### Project Details

- Location:  
Gretna, Nebraska
- Size:  
17,960 sq. ft.
- Type of Construction:  
Pre-Engineered Metal Building
- Project Completion:  
1997
- Serving the western half of Sarpy county, Nebraska.
