

Hughes Brothers Shipping & Receiving

Efficient Sending

This is our fifth project in the last three years for Hughes Brothers. We are designing and constructing a new Shipping & Receiving building for them. This 30,000 square foot pre-engineered metal building with pre-cast wall accents will allow Hughes to more efficiently handle the large volume of material that comes in and goes out of their plant on a daily basis.

Project Details

➤ Location:
Seward, Nebraska

➤ Size:
30,000 sq. ft.

➤ Type of Construction:
