

Tenant Finish

## Mechanical Sales- Lincoln Office

### Major Transformation

Ayars & Ayars, Inc. is extremely proud of the work we did on our Mechanical Sales project. The Owner had a very specific vision for the building and we were glad to help make the dream a reality! The interior redesign and renovations to the basic office building have transformed it into a state of the art sales and engineering office. We also added a new concrete patio that carries the comfortable and contemporary atmosphere inside to the outdoors. We enjoy working closely with detail oriented clients to help them take an idea in their head and make it a reality!
