

Oxford Glen - Sachse

Memories

Our second Oxford project is a memory care facility in Sachse, Texas. Oxford Glen is designed with residents in three pods surrounding an atrium and support center. Each pod contains: 12 bedroom suites surrounding a commons area featuring a fireplace, a full kitchen and a dining area that opens into a safe, enclosed courtyard. Outside of the individual households, Oxford Glen residents and their families will enjoy the open atrium, serenity therapy room and activity center.
