

## University of Nebraska Medical Center Generator Renovation

### Powering Up

When a fire significantly reduced the University of Nebraska Medical Center's standby power production capabilities, Ayars & Ayars, Inc. expertise in design-build construction allowed work to begin on a replacement structure almost immediately. Utilizing fast tracking enabled foundations to commence while details for the structure were being finalized. Our scopes of work on this project included demolition, footings, concrete flatwork, poured concrete stem walls, building erection and interior finishes.

### Project Details

- Location:  
Omaha, Nebraska
- Size:  
3,605 sq. ft.
- Type of Construction:  
Pre-Engineered Metal Building
- Project Completion:  
2008
- Ayars & Ayars design-build expertise was the key to this project's success.
