Cornhusker Bank Renovation

Brick and Mortar

Creating an inviting presence that reflects Cornhusker Bank's reputation of strength, community involvement and customer service was the goal of this design-build exterior renovation project. Highlighting the abilities of our masons, an attractive mix of lightweight masonry veneers and stucco give the appearance of traditional brick while reducing the cost and duration of the project. Additional Ayars & Ayars, Inc. scopes of work include: demolition of the existing exterior finishes, window replacement, sidewalk/paving repairs and new signage.
