Gotcha Covered

Beautifully Practical

The exterior design of this unique facility is based on reoccurring diamond patterns; this motif continues on into the building's entryway. Exposing the structural steel and duct work adds to the contemporary feel of the interior. Tilt-up concrete buildings are not prefabricated; each one is custom-designed for our client's needs and preferences. A full range of building finishes, wall textures and adornments, colors, even curved walls, are easily achievable. Tilt-up construction provides Ayars & Ayars, Inc. with virtually unlimited flexibility in developing a building that is functional, durable and aesthetically pleasing.
