

MetalQuest Unlimited, Inc. Addition

Back, Back, Back

Ayars & Ayars, Inc. is proud of our long-term relationship with MetalQuest Unlimited, Inc. In 1999, we were chosen to erect the original facility, we were invited back in 2004 to add additional manufacturing space and now we are pleased to return for a second addition. Similar to the first 2 projects, the second design-build addition highlights the abilities of our concrete and steel erection crews. Our scopes of work included: site development, foundations, steel erection, concrete placement and interior finishes.
