

# Thayer Central Community School

## Phase 1

This 14,950 sq. ft. addition allows for the Thayer Central Community School district to consolidate all of their satellite locations to one site. The addition includes eight classrooms, administration offices, computer lab / storm shelter, additional space to the existing Intermediate School building, as well as site work renovations to the south and east sides of the new building addition, which included a select remodel in the existing building. Potential phases in the future will further add to the enhancement of Thayer Central.
